

Gilbert Verdian

CEO and Founder

As CEO and Founder of Quant, Gilbert is focused on unlocking the power of blockchain for everyone, to create an empowered, interconnected world.

Gilbert has more than 20 years of cybersecurity experience and C-level accountability as a CISO, CIO and CTO. He has worked in government - for Downing Street, HM Treasury, the Cabinet Office, Ministry of Justice and NSW Health – and has also served in the private sector, at Mastercard, Vocalink, CSC, EY, PwC, BP and HSBC.

With a keen interest in disruptive technology, Gilbert established the Blockchain ISO Standard TC307 initiative in 2015 and is the Convenor of the the Interoperability working group WG7 for ISO.

About Quant

Quant is the future of finance. Today.

We unlock the power of blockchain for everyone by delivering interoperable ecosystems and real-world solutions that simply work: lowering costs, enabling new business and mitigating risk.

We work with financial institutions, governments, multinational companies, and the partners and fintech developers who support them, to deliver enterprise-grade technology built with security and compliance front of mind.

Founded in 2018, Quant is UK-based with a US presence. We spearheaded the Blockchain ISO Standard TC307 adopted by 57 countries and organisations worldwide and solved interoperability with the creation of the world's first blockchain-agnostic API gateway, Overledger.

Our high-integrity leadership team has deep experience in government, financial services, technology, healthcare, and management consulting. Our partners include Amazon Web Services and Oracle, and we're a founding member of the Digital Pound Foundation.
