

Peter Marirosans

Chief Technology Officer

Pete heads Quant's technology development, architecture, and engineering strategy to help it bring its transformative blockchain solutions to market. With more than 20 years' experience, Pete joined Quant in 2019, and is adept at leading teams to solve some of the most complex issues in IT. His focus includes project implementation design, process and project management, technical architecture, cybersecurity, gap/risk analysis and agile methodology.

Prior to Quant, Pete worked in various technology roles across the energy and utilities sector, including nearly eight years with Total Gas & Power Ltd. When Pete is not working on technology, he spends his time on DIY and traipsing with his family around the English countryside.

About Quant

Quant is the future of finance. Today.

We unlock the power of blockchain for everyone by delivering interoperable ecosystems and real-world solutions that simply work: lowering costs, enabling new business and mitigating risk.

We work with financial institutions, governments, multinational companies, and the partners and fintech developers who support them, to deliver enterprise-grade technology built with security and compliance front of mind.

Founded in 2018, Quant is UK-based with a US presence. We spearheaded the Blockchain ISO Standard TC307 adopted by 57 countries and organisations worldwide and solved interoperability with the creation of the world's first blockchain-agnostic API gateway, Overledger.

Our high-integrity leadership team has deep experience in government, financial services, technology, healthcare, and management consulting. Our partners include Amazon Web Services and Oracle, and we're a founding member of the Digital Pound Foundation.
