

Overledger 2.2.14 Release notes

What's new?

Overledger 2.2.14

This is an engineering release of Overledger that introduces technical changes within the platform to enhance security and scalability and lays the framework for future functionality.

It also supports changes for future releases including:

- Improvements to internal configuration mechanisms
- Additional field-level validations for Ethereum and Hyperledger Fabric transactions
- Expanding smart contract monitoring and subscription functionality for QRC-721 tokens.
 - Added two new types of smart contract events: Mint Tokens and Create Transfer

Improvements

No customer facing changes.

Known issues

No known issues.
