

## Overledger 2.2.19 Release notes

### What's new?

#### Overledger 2.2.19

This is a maintenance release that resolves minor issues with smart contract subscriptions. There is no new functionality or features included in this version.

#### Improvements

We have fixed an issue with subscribing to receive smart contract updates to include value filters.

#### Known issues

- When preparing transactions, an incorrect error message was returned if a space was added at the end of the network value in the location object. This issue has now been resolved.
- Users can only currently subscribe to receive updates for an address with one blockchain network. This issue will be resolved in a future product release.
