

## Overledger 2.2.22 Release notes

### What's new?

#### Overledger 2.2.22

Release OVL 2.2.22 adds more functionality for the QRC721 token APIs.

Customers can monitor smart contract events for their QRC721 token and receive updates directly to a callback URL.

#### **Feature #1: Subscribe to receive updates when a QRC721 token has been collected**

##### **Sandbox**

API: POST <https://api.sandbox.overledger.io/v2/tokenise/tokens/subscription/qrc721/collect>

Type: Collect Asset

##### **Production**

API: POST <https://api.overledger.io/v2/tokenise/tokens/subscription/qrc721/collect>

Type: Collect Asset

##### **Documentation**

API documentation is [here](#).

#### **Feature #2: Retrieve a list of subscriptions including QRC tokens**

##### **Sandbox**

API: POST <https://api.sandbox.overledger.io/v2/webhook/subscriptions>

##### **Production**

API: POST <https://api.overledger.io/v2/webhook/subscriptions>

## Documentation

API documentation is [here](#).

## Improvements

None

## Known issues

An incorrect error message is returned when a space is added to the end of the network value in the location object when preparing any type of transaction. This will be fixed in a future product release.
