QUANT

Overledger 2.2.6

Release notes

What's new?

Overledger 2.2.6 focuses on maintenance and scalability

This is an engineering release of Overledger to improve future scalability of the platform.

This upgrade does not contain new APIs and there are no changes to the user experience.

Enhancements include:

- Implementation of a new API error code framework to standardise error messages.

- Backend improvements to Bitcoin Segwit transaction support.

- Foundational improvements to enable faster and more efficient deployment of new QRC smart contracts and tiers.
