

Overledger Platform

The industry standard for building on blockchain

Organisations worldwide are drawn to blockchain and its potential to enhance trust, security, and efficiency across broad sways of the economy but are discouraged by the complexity, expense and uncertainty involved.

Overledger combines all of Quant's pioneering innovations in an easy-to-use platform with the strictest security protocols that can be integrated into your existing systems, making your connection to blockchains simple, trusted and future-proof.

The technology once exclusive to major institutions is now at your fingertips via Overledger Platform.

Achieve the benefits of trusted blockchain interoperability.

Increase efficiency

Manage your cost ratios, record-keeping, and settlement times with ease across multiple chains by tokenising and using mDApps.

Unleash liquidity

Prepare your assets for any network and easily move them across as a whole or fractionalised.

Reduce risk

Create pre-agreed logic in our superior smart contracts with the latest security protocols.

Key features

Multi-chain connectivity to private or public networks

Superior smart contracts with a range of flexible functions built-in

Digital assets engines for smart tokens and bridges creation

Managed service with network nodes secured and updated by Quant

Turn-key solution with robust user guides

Cloud-native microservice architecture for a high-performing and flexible platform

Single access point for account management and access configuration

Enhanced support and SLAs available

Delivered by experts in cyber security and critical infrastructure

Powerful interoperable APIs across all connected networks

Multi-DLT decentralised applications (mDApps) with a single code standard to run on multiple chains

Capital markets
Fund tokenisation and alternative asset digitisation

Central banks
CBDCs

Commercial banks
Tokenised deposits

Innovators
Decentralised finance

Multinational companies
Supply chain traceability

Payment companies
Smart money and next-generation payments systems

The world
Sustainability projects and climate initiatives

Why us

LACCHAIN

nexi

ORACLE

U.S.T

Our technology combines industry standards we help create.

Our expertise is tailored to the unique needs of large organisations operating in complex ecosystems. Together with our clients and partners, we build the foundation of the new economy.
